“Eco-Innovation supporting a Green Economy in the Alpine region”

Workshop for the preparation of the Action Programme for a Green Economy in the Alpine region

Dear Madam, dear Sir,

The Federal Republic of Germany, represented by the German Environment Agency, and the Permanent Secretariat of the Alpine Convention together with the Upper Rhine Cluster for Sustainability Research are pleased to invite you to a workshop on “Eco-innovation supporting a Green Economy in the Alpine region” on

13 November 2017

in **Basel, Switzerland**. We would like to discuss with you

- how eco-innovation activities of research institutions, companies, networks and clusters can be organised to foster a Green Economy in the Alpine region;
- sectors with successful eco-innovation approaches in the wider Alpine region (e.g. Upper Rhine Cluster for Sustainability Research, Smart Specialisation with Smart Clusters) and
- further needs to support the interplay between science and entrepreneurs and promote transnational Alpine clusters.

The workshop aims at bringing together all committed actors within the Alps - from enterprises to associations, public authorities and research institutions, who want to contribute to, and to steer the transformation towards a Green Economy. It will be held in English and, if required, with translation to French and German. To allow for sufficient space and time for exchange and discussion, the number of participants is limited to 30 persons. The event takes place from 10.00 am to 04.00 pm. You will receive an invitation with further details and the registration procedure in September 2017.

Background of the workshop

The economy in the Alps shall become greener! The [sixth Report on the State of the Alps \(RSA6\)](#) defines key aspects for this purpose. To sum up its conclusions and results, a Green Alpine Economy should be

- low-carbon as well as energy and resource efficient,
- based on ecosystem services and natural capital and
- fostering the quality of life and well-being.

Based on the results of the RSA6, the XIVth Alpine Conference, held in 2016 in Grassau, decided on the elaboration of an ambitious and comprehensive Action Programme for a Green Economy in the Alps. Thereby, the transformation process in the Alpine region will be supported and the basis for specific measures, projects and actions will be created. Local and regional actors play a crucial role for the preparation of the Action Programme. A series of workshops with various thematic priorities will be held in autumn 2017 to involve relevant stakeholders in shaping the future of an Alpine Green Economy.

For any questions on the workshop in Immenstadt, please do not hesitate to contact our team member Dr Sabine Zillmer (sabine.zillmer@spatialforesight.eu, +49 30 80 60 41 75). On behalf of the German Environment Agency, we are responsible for the preparation of the Action Programme and thus for the organisation and implementation of the workshops. Our consortium consists of blue! advancing european projects (Munich, DE), CIPRA International (Schaan, LI) and Spatial Foresight (Berlin, DE).

Kind regards,

Your “Green Alpine Economy” workshop team
