Upper Rhine Cluster for Sustainability Research

Template 1 for Kick-off meeting, Freiburg 07./08.10.2016

Working Title (for joint project/thematic field of cooperation)/Axis 2

Working group on integrating individual/social differences (psychological, sociological) factors in modelling

Sketch of content:

- Gap: There is a methodological gap regarding the integration of human behavior into different types of models.
- Objective: Exchange between different disciplines to find methodologies to integrate human behaviour into modelling such as for example (but not limited to):
 - energy system models
 - or models on indoor air quality

Intended application(s) for funds:

Working group (internal funding within URCforSR)

Disciplines and Universities [(a) = already involved; (b) = looking for]

- Economics, Physics, Architecture, Psychology, Engineering
- Sociology, all other interested Partners

Group members (preliminary):

CNRS (Blond), KIT-DFIU (Schumacher, Mainzer), Uni Basel (Schubert), ENSAS (Dufrasnes), EIFER (Karl)
