Review of the Follow-Up Workshop:

The annual meeting of the URCforSR focused on the reflection and presentation of the working group development in the five different axes of the cluster. About 60 participants came to Freiburg and had the chance to listen to a diverse number of input speeches and working group presentations as well as to learn from the posters prepared by the cluster's enablers.

Very impressive is to see how well the different working groups develop and what they achieved so far. We saw that there are common publication projects, thematic workshop preparations as well as various project proposals. The latter reach from smaller binational funds between researchers from Freiburg and Strasbourg, to trinational proposals for the DFG/SNF/ANR cooperation and INTERREG as well as to multinational COST-Action proposals.

The cluster members acknowledged the sessions regarding financial issues, where experts from the University of Freiburg and Eucor - The European Campus could inform about possible ways of boostering the cooperation between the researchers. The other session on the North America strategy of Eucor respectively the cluster gave proof of the cluster's ambition to establish an internationally well known network in the sustainability sciences. We appreciate the support of the experts as well as the vivid contributions of the cluster members and look forward to the future development of the cluster.

Working Group "Leverage Points"

(Stefan Baumgärtner, Frank Krysiak, Aya Kachi, Jens Köhrsen, Lena Blomartz, Annika Sohre)

By Dr. Annika Sohre

Current state (Sept 2016 - Present)

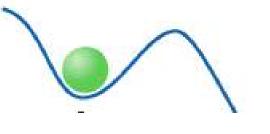

- **Identified** a common research theme.
 - "Sustainability transitions under uncertainty: Modeling and analyzing the use of leverage points"
- Organized 6 meetings.
 - Finalized the overall approach and subtopics of the project.
 - **Preparing** a funding application.
- **Developing** individual and common research plans.
- **Project planned for** late 2018 late 2020, if all goes well.

Why Leverage Points

Leverage Points:

Transformation towards sustainability by using leverage points -Small effort, big changes

So far, leverage points have been studied:

- 1. on a system level.
- 2. with an assumption of a positive resulting state.

If we want to identify policy interventions as leverage points, we need to know:

- 1. micro-mechanisms that create LP.
- 2. conditions under which transitions lead to "desirable" state.

Project and subtopics

	Macro level	Micro level	
Theoretical modeling	Q: How do the initial state characteristics (ball features) and the transition environment characteristics (basin shape) shape the emergence of LP?	Q: How do LP emerge from changing behavior patterns of individual agents? Q: Under what conditions, and how should LP be used to induce a "desirable" state?	
Empirical testing	Q: Can policy interventions that promote actor linkages create LP? Q: Are there risks of generating "undesirable" state, due to the very interventions that enhance actor linkages? Case: Developer investments in building energy efficiency.	Q: How do local energy initiatives (or opponents) employ leverage to promote (or block) energy transitions? Q: What risks (e.g. side effects) do they involve? Cases: Cities – Freiburg, Basel	

Axis II) Energy, Infrastructure & Societal Change

for Energy Research Competence Center for Research in Energy, Society and Transition

Energy, Infrastructure and Societal Change

Uni Basel Research Group + Joint Project KIT/UniBas

UniBas Team

- Lead: Hannes Weigt
 2 PostDocs (Ingmar Schlecht, Rebecca Lordan-Perret) and 5 PhDs (Léo Chavaz, Ali Darudi, Carla Mendes, Jonas Savelsberg, Moritz Schillinger)
- Research Center on Sustainable Energy and Water Management (*Forschungsstelle f
 ür Nachhaltige Energie- und Wasserversorgung, FoNEW*)
- Integrated into the SCCER-CREST (Competence Center for Research in Energy, Society and Transition)
- Currently addresses mainly *applied topics in electricity markets*

Research Topics UniBas

• Electricity Market Modeling:

- Future Market Development
- Market and Policy Design
- Integration of Renewable Energies
- Hydropower
- Demand Side and Energy Efficiency
- Climate Change and Energy Markets

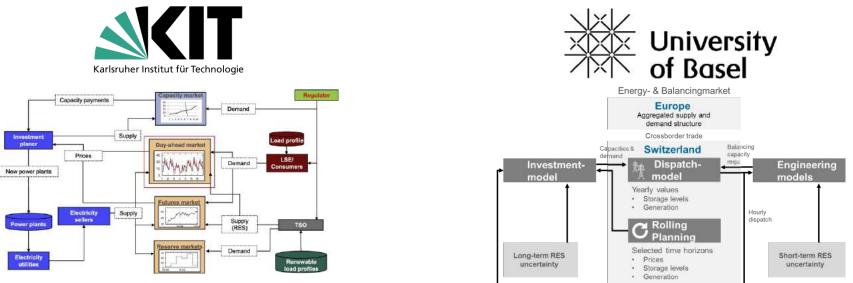

Currently ongoing 3rd party projects:

Future of Swiss Hydro, Assessing Future Electricity Markets, Reducing Swiss household energy demand, The role of energy storage

1. Research Idea: Involved Teams and Meetings so far

- 23.11.2016 Kick-Off Meeting, Model Presentation
- 24.04.2017 Workshop on Balancing Markets and Market Design

04.05.2017 Trinational Workshop of Axis 2:

"Energy, Infrastructure and Societal Change"

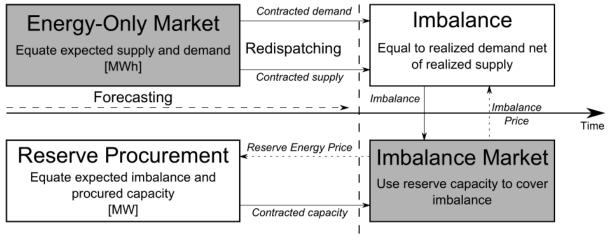

1. Research Idea: Design of Interconnected Balancing Markets

Realtime

- Complex Electricity Market Design
- Interplay between energy delivery and capacity provision
- RES production uncertain

Main research question: How can we enable the participation of renewable energies to provide system stability?

1. Research Idea: Structure and Current Status

Objective: How can we enable the participation of renewable energies to provide system stability?

Research Questions:

- How to secure short term system security?
- How to enable cross-border provision and the potential impact?
- Role of renewables: supporting or challenge for balancing market?

Envisioned Structure:

- 1. Development of different balancing market concepts/designs
- 2. Analysis of company strategies / market actor behavior
- 3. Modeling and Quantification of market concepts:
 - Integration into Agent Based Market Model
 - Extension of Cross-Border Aspects

Project Partners: KIT:

- Dogan Keles, Florian Zimmermann (IIP)
- Jérémy Rimbon (IIP, DFIU)
- Fabian Ocker (ECON) Uni Basel:
- Hannes Weigt (FoNEW)

Next Steps:

- 1. Design of Project Sketch
- 2.Identification of Funding Options

Upper Rhine Sustainability Cluster Workshop

Overview of SENK⁴

Deutsch-Französisches Institut für Umweltforschung Institut Franco-Allemand de Recherche sur l'Environnement

fiu

Accepted project proposal (step 1): Sustainable transport in the Upper Rhine Valley

PD Dr. Patrick Jochem

German-French Institute of Environmental Research (DFIU)

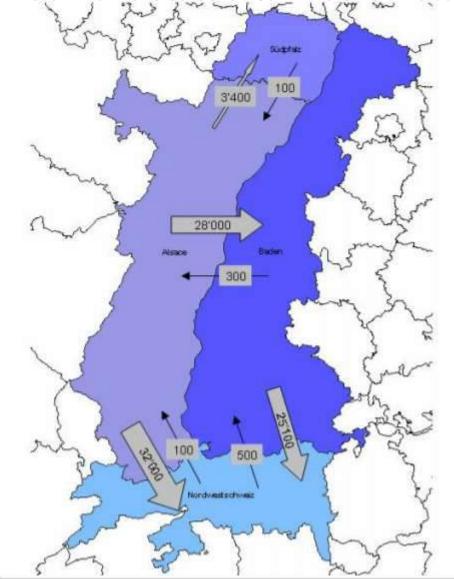

KIT - The Research University in the Helmholtz Association

www.kit.edu

Current status & mission statement

- The environmental impact from transport is significant.
- Number of cross-border trips
 is increasing
- Share of passenger car is high
- Differences in mobility patterns
- It's an interesting testbed for Europe!
- → We need a reliable and sustainable transport concept for Europe!

WP1: Sustainable transportation How to mitigate CO₂ emissions by changing the individual mobility behaviour?

Identification of ...

- current Level-of-Service of local transport system (at municipality level)
- current need for mobility and mode choice of users
- Development of a Sustainable Mobility Monitoring System (SMMS)
- Objective: How to make the system more sustainable (e.g. by increasing the share of multi-modal trips)?
- Exchange of information between municipalities (competition).
- Development of potential instruments/measures to improve the footprint of transport.
- Implementation of some instruments and their evaluation.

WP2: How to operate charging stations at public institutions

- Political objective to increase share of EV.
- However, public institutions do not provide charging stations even though they are important for a successful market penetration of EV.
- Tasks: Identification of (legal!) hurdles.
- Development of an convincing operating approach which allows to provide electricity to employees and guests in an easy application.
- Implementing this approach to many public institutions.
- Testing controlled charging via ISO 15118.

Preamble

- **Prosumer** : a "consumer" and a "producer
- Produce and share surplus energy with grid and other users
- The term was used for the first time in 1980 (*Alvin Toffler, "Third Wave*")
- Industrial or residential prosumers

Aim of the project

- Mapping prosumers in the Upper Rhine Region.
- Analyzing the impact of prosumers in grids.
- Improve Home Energy Management System (HEMS).
- Propose techno-economic, environmental, and social optimization of prosumers.
- Establish the Prosumer Models for local and tri-national energy sharing network, considering the specific constraints of the three countries.

TriProsumer for Management and Sharing Energy

Benefits of the TriProsumer model

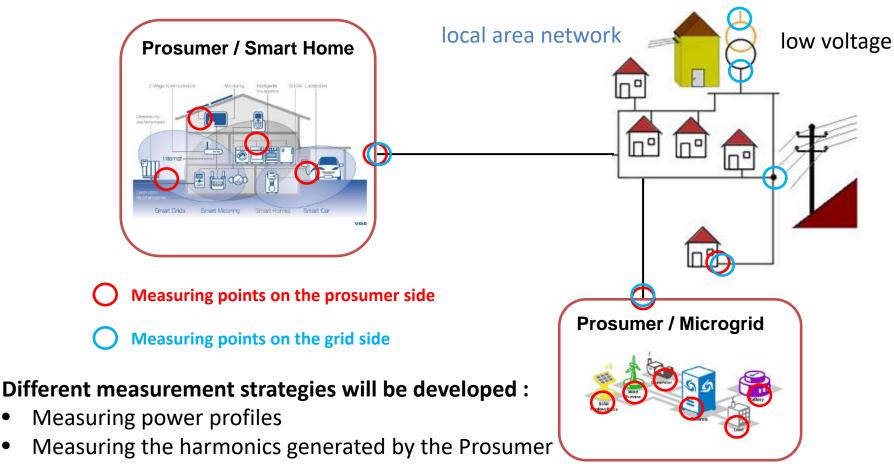

- Increase the autonomy of the green energy production (while increasing the economic interdependence of the grid).
- Control of the stability and the quality of the power grid including prosumers.
- Improve the local use of the produced or stored energy.
- Improve the peak demand management.

Sketch of content

- Mathematical and economic modelling of the Prosumer as an autonomous system.
- Mathematical and economic modelling of the interaction between the Prosumer and the grid.
- Electrical signal measurements and analysis with advanced techniques.
- Control and optimization techniques.
- Communication technologies.
- Data analytics (statistics, machine learning, ..)
- Economic, environmental, and social optimization.

Data Acquisition – First steps Overview of possible measuring points

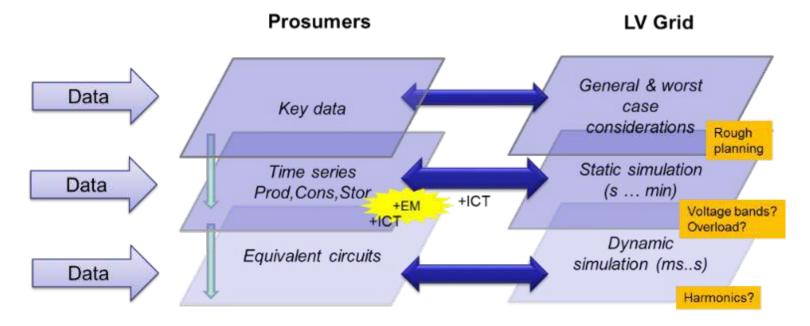

Distribution grid

- Measuring energy flows

•

Multi-scale time model

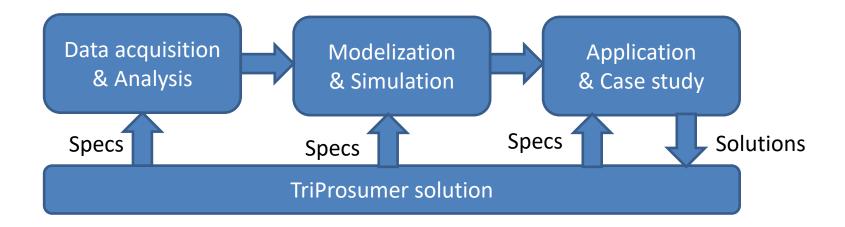

Data on the behavior of the Prosumer and its interaction with the electricity grid will be collected, in cooperation with the project partners in the three countries.

These data will include:

- Aggregated measures from the power grid.
- Time series with high resolution of active and reactive power.
- Frequency spectra of the individual components of the system, or of the Prosumer.

General Scheme of the approach

Existing experimental micro-girds

- Ottmarsheim (Enedis, France),
- Freiamt (Netze, Germany)

Area of competence (Core competencies)

- FHNW (CH)
 - Application of power electronics in smart grids, physical modeling of energy res. & grid modeling
 - Economics and IT of grid / consumer interaction, Thermal building simulation
- HSO (D)
 - Grid simulation & stability analysis
 - Variability & uncertainty of RES, RES & Microgrid modeling & -management, numerics & model reduction
 - INES Microgrid/Smartgrid with SmartLink (project with DSO)
 - Storage Technologies, Aging, Battery/grid interaction
- UHA (F)
 - Signal processing, Artificial Networks, smart metering, pattern recognition & event detection, Power quality
 - Non-intrusive load-monitoring
- KIT (D)
 - PERSEUS-NET or PowerAce models
 - Modeling the investigated grid/distribution system and provide simulation of energy generation and exchange in/between households of a grid
 - Optimising the use of renewable energy within a grid
- Uni Landau ...
- Uni Freiburg ...

To do:

- Consultation between the partners to better concretize the concept and the original contributions of each.
- Funding programs
 - Offensive Sciences 2018. Interreg V Upper Rhine, Specific Objective 6
 "Reducing the environmental impact in the development of the economy and
 urban planning in the Upper Rhine".
- Look for the concrete and real interest of **companies** in the project?
 - We have to contact the companies and check their needs: are they interested in the results of the project? What would be their contribution? What would the project bring them?
- Cooperation with economists (impact of a change in business model).

Thank you

Axis IV) Resource Management

U N I V E R S I T Ä T KOBLENZ · LANDAU

Synergies from an Integrated Renewable Energy Supply and Storage System in the Upper Rhine Region (URR): An Interdisciplinary Perspective

Axis 4 Resource Management

Group members: Barbara Koch (Freiburg), Philippe Hamman (Strasbourg), Sophie Gambardella (Strasbourg), Elisabeth Lambert (Strasbourg), Jens Köhrsen (Basel), Jérémy Rimbon (KIT), Jens-Peter Schneider (Freiburg), Bernhard Neumärker (Freiburg).

Thematic focus: The Working Group 'Energy Transformation' in Axis 4 is exploring from at least four different perspectives (technical, economic, legal, sociocultural) the synergies and potentials that would result from an integrated renewable energy supply and storage system in the Upper Rhine Region (URR).

Aim: In a first phase, the group will submit a proposal for Eucor Seed-Money (October 2017 call) to fund the concept phase of this project. In a second phase, a full project proposal will be developed. The funding target here is a Horizon 2020 call (Societal challenges) or the LIFE Programme of the European Commission.

Work package 1 (Technical)Work package 2 (Sociocultural)Using the agent-based model PowerACE, KIT- DFIU will simulate the potential amount of renewable energy that can be produced and stored in the URR, and then infer the need for investments in storage capacities. This analysis will contribute to evaluating the current and future potentials from cross-border storage by simulating the development paths of the grids, production and storage plants in the URR.Work package 2 (Sociocultural)	
and storage URR – Pote	RE supply emarket in entials and gies Work package 4 (Economic) This group will deal with the identification of institutional and collective barriers and drivers of the transition. Especially barriers of the system in democracies block social and policy changes towards an energy efficient economy. For instance, strategies to prevent relatively high cost shares of the energy transition lead democratic systems towards a deep delay in energy efficiency enhancing politics.

Status Quo: One group meeting took place on 20 September 2017. Inputs for the Eucor Seed-Money proposal have been delivered by the partners and the joint proposal has been put together.

Barriers: Integrating the different perspectives into a coherent project proposal.

III) Financing & North America

Eucor – The European Campus Financial opportunies and more

www.eucor-uni.org

Vision

Eucor - The European Campus

the European future of the universities on the Upper Rhine

Emergence of a clearly profiled science and research area

- Enhanced visibility at the national and international level
- Establishment of strong partnerships for long-term collaborations in research, instruction and doctoral training.

The 5 member universities

Eucor – The European Campus: the first European Grouping of Territorial Cooperation (EGTC) founded solely by universities A European legal entity – "on the path to the first European university"

UNIVERSITÄT BASEL

Founded in 1460 14.000 students www.unibas.ch

KARLSRUHE INSTITUTE OF TECHNOLOGY Founded 1825 25.000 students www.kit.edu

ALBERT-LUDWIGS-UNIVERSITÄT FREIBURG

Founded in 1457 25.000 students www.uni-freiburg.de

HAUTE-ALSACE

UNIVERSITÉ DE HAUTE-ALSACE Founded in 1975 8.000 students www.uha.fr

UNIVERSITÉ DE STRASBOURG

Founded in 1621 50.000 students www.unistra.fr

www.eucor-uni.org

The European Campus in numbers

- 2.300.000.000 €
 Total budget of the 5 universities
- **115.000** Students
- **15.000** Researchers
- 11.000
 PhD candidates

A "critical mass" on the European and international scale

- The European Campus is a **cross-border university alliance** that preserves the autonomy of the partner universities, while at the same time enabling them to submit **joint funding proposals** in Germany, France, Switzerland, and Europe as an autonomous entity.
- The European Campus means joint professorships, joint administrative personnel, joint service departments, joint doctoral candidates and students, joint research projects, and dual degrees
- The European Campus has **common research infrastructures** and will serve as a magnet for attracting the best young academics and international students
- The European Campus is a **pioneer** that can be emulated by other cross-border regions

Workpackages of the EU-financed Interreg Project (2016-2018):

- Establish a **common strategy** and development plan for the European Campus (emerging fields in research, smart specialization)
- Work out conditions for **joint appointments** of academics (co-options and/or cross-appointments)
- **Common fund-raising** for collaborative research projects (mapping, joint science support centre...)
- Develop new, innovative **international degree programs** (Liberal Arts and Science Programs, Fast-track-PhDs)
- Strengthen the **regional connections to the labour market** (career opportunities and links to enterprises)
- Improve the intercultural competencies of the academics and the admin staff
- Develop a common internationalization strategy

www.eucor-uni.org

Recent example for successful European Campus cooperation

"QUSTEC": "QUantum Sciences and Technology at the European Campus"

- Graduate Academy based on 4 member universities + IBM
- Proposal submitted within the H2020 MSCA "Cofund"
- Up to 50 joint PhD students
- Shared core facilities

- e Source: http://www.qsim.uni-freiburg.de
- Business partners (sensoring); total budget of 10 Mio EUR (if proposal accepted)

Added value of the European Campus

- Common strategic lobbying towards the European Commission: Lol by the PIs and the President of the European Campus to participate in the Upcoming Flagship Initiative de l'Union européenne
- The legal entity of the EGTC can be used for joint applications

www.eucor-uni.org

Seed Money for the European Campus

Initiate new and innovative collaborations

- Annual budget of 300,000 EUR provided by the member universities to the EGTC for 3 years (2018, 2019, 2020)
- Main eligibility conditions for collaborations
 - Between at least 2 member universities,
 - Of at least 2 countries,
 - In Research, Innovation and Education.
- Maximum amount per project: 60.000 EUR for a total duration of maximum 18 months

Call for proposal 2017:

- Deposal deadline : 2 October 2017
- Earliest starting date for the funding: 01/01/2018

\rightarrow For more informations

www.eucor-uni.org/seed-money seed-money@eucor-uni.org

Funding opportunities within the Interreg-Programme

COLUMN DE LA CASA

Wissenschaftsoffens

Interreg VA Upper Rhine: 3 main funding possibilities

- 1. Science Offensive of the RMT/TMO
 - 3rd call for proposals will come in 2018
 - Total volume up to 7 Million Euros (in 2016)
 - Project lead has to be in the French or German parts of the Upper Rhine
 - Cofinanced by Interreg (50%) and regional partners (25%)
 - Max. 1 Mio. total budget per project
 - Competitive call based on excellence (peer review)
 - Eligible research topics
 - Renewable energies, Technologies in the field of energy and environment, rational ressource management, green economy
 - Sustainable mobility, automotive construction, transport and logistics
 - Information and Communication Technologies, Green IT, smart products
 - Health and Care, medical technologies, better living and better ageing

www.eucor-uni.org

Funding opportunities within the Interreg-Programme

Interreg VA Upper Rhine: 3 main funding possibilities

- 2. Call for interest within the axis A "intelligent growth"
 - The participation to the Call of interest is the last opportunity to still pretend funding within the ongoing Interreg VA Programme (besides the possibility to participate in the Offensive Science).
 - 50% cofinancing of the Interreg-VA-Programme
 - 3 specific objectives of this axis:
 - Objective 1 : Increase the cross-border capacities for a top level Research and Innnovation in the Upper Rhine
 - Objective 2 :Increase the participation of companies in cross-border projects in Research and Innovation in partnership with Higher Education and Research Institutions
 - Objective 3: Increase the number of applications and innovations developed by the cross-border consortia of the Upper Rhine
 - Final deposal date for the templates within the call for interest : 3 April 2018, 12.00 am

Funding opportunities within the Interreg-Programme

Interreg VA Upper Rhine: 3 main funding possibilities

- 3. Call for interest within the axis D "Cooperation of public administration and the civil society"
 - 50% cofinancing of the Interreg-VA-Programme
 - 2 specific objectives of this axis:
 - Objective 11 : Improve the cross-border services of the administrations and institutions
 - Objective 12 : Increase the identification of the citizens with the cross-border Upper Rhine Region
 - Final deposal date for the templates within the call for interest : 15 January 2018, 12.00 am

Albert-Ludwigs-Universität Freiburg

Outline

- DFG ANR / DFG SNF Funding
- Funding by the German Government
- Foundations
- Startup-Funding
- Freiburg Funding Database
- Contact

Albert-Ludwigs-Universität Freiburg

Joint Proposal Submission with Austria and Switzerland (D-A-CH): DFG and SNF

Research Grants

- "Lead Agency" process
- 3 years funding
- Swiss deadlines: April 1st and October 1st

Research Units (Forschergruppen)

- 2x3 years
- < 9 Pls (sub-projects)</p>
- up to two Swiss sub-projects or participations in German subprojects (for exeptions please contact DFG)

Joint Proposal Submission with Austria and Switzerland (D-A-CH): DFG and SNF

- Lead Agency: organization where the higher funding amount is requested. In unclear or borderline cases, the funding organisations involved must be contacted prior to submission.
- In projects in which only a very small proportion of the work is carried out in Germany or Switzerland, funding can be fully covered by the agency (DFG or SNF) with the larger financial burden ("Money Follows Cooperation Line").
- Neither DFG nor SNF make special funds available for the funding of those cooperation projects. Proposals compete with all other proposals in the same programme.
 After peer review proposals have to pass the national review boards.
- → talk to your DFG contact

Albert-Ludwigs-Universität Freiburg

DFG – International Research Training Group (Internationales Graduiertenkolleg)

- joint doctoral training programme between a German university and a university abroad
- About 20 doctoral researchers from each University; 10-15 funded by DFG
- 4,5 years (9 years if funding is continued on evaluation)

SNF: National Research Programmes (NRPs)

- Participaton of German partners is possible
- e.g. National Research Programme "Sustainable Economy"

International Cooperation DFG-ANR

ANR-DFG Funding Programme for the Humanities and Social Sciences

- There are no specifications as to research topics.
- Proposals for projects with components of data-related infrastructures are also possible.
- up to three years
- No open call (deadline was March 15, 2017)

ANR-DFG Cooperation in Natural, Life and Engineering Sciences

- (deadline was October 27, 2016)
- No open call

(Again:) DFG – International Research Training Group (Internationales Graduiertenkolleg)

- joint doctoral training programme between a German university and a university abroad
- About 20 doctoral researchers from each University; 10-15 funded by DFG
- 4,5 years (9 years if funding is continued on evaluation)

Open Research Area (ORA) for the Social Sciences

- ORA is an agreement between ANR, France, DFG, Germany, the Economic and Social Research Council (ESRC, UK) and the NWO, Netherlands.
- Deadline for Outline Proposals was: 5 July 2017

UNI FREIBURG

Project funding by the German Government

- Energy Transition
- Sustainable development
- Green Economy
- Bioeconomy
- Environment and Climate
- Electromobility
- Social-Ecological Research
- •
- \rightarrow Look for calls for applications

https://www.bmbf.de/foerderungen/

Albert-Ludwigs-Universität Freiburg

Project funding by the German Government

BMBF: Junior Research Groups in Sustainability Research

- 5 years
- team of up to 5 young researchers
- deadline for draft proposals: April 27 (once a year)

BMBF: Junior Research Groups "Bioökonomie als gesellschaftlicher Wandel"

- 5 years
- team of up to 5 young researchers
- deadline for draft proposals: January 17, 2018

Bundesministerium für Bildung und Forschung

Franco-German Fellowship Programme on Climate, Energy and Earth System Research Funding of research groups within the framework of the implementation of the Paris Climate Agreement

- Researchers from all over the world to cooperate with German and French partners to advance sustainability research:
 - 1. Research on climate change
 - 2. Research for the energy transition
 - 3. Research to understand the Earth system.
- 4 years, up to 1 million euros for juniors and up to 1.5 million euros for senior researchers
- staff (including position of the applicant), consumables, materials
- Application deadline for statement of interest: 13 October 2017 (full proposals: February 15, 2018)

Albert-Ludwigs-Universität Freiburg

Deutsche Bundesstiftung Umwelt (DBU -(German Federal Environmental Foundation)

Project funding

- exemplary and solution-oriented model projects for the protection of the environment
- sustainable development in its ecological, economic, social and cultural aspects, with special consideration of small- and medium-sized businesses in their dynamic diversity
- "normal" project + grant size: 3 years

Albert-Ludwigs-Universität Freiburg

Europe and Global Challenges

(Riksbankens Jubileumsfond / VolkswagenStiftung / Welcome Trust)

- International research group with non-European partners
- 500,000 900,000 Euros for up to four years of research.
- No open call.

Albert-Ludwigs-Universität Freiburg

UNI FREIBURG

Belmont Forum

- 2017: Transformations to Sustainability
- 2016: Sustainable Urban Global Initiative (SUGI): Food-Water-Energy Nexus
- 2015: (1) Mountains as Sentinels of Change;(2) Climate Predictability and Inter-Regional Linkages
- 2014: (1) Arctic: Call for Proposals(2) Scenarios of Biodiversity and Ecosystem Services
- 2013: (1) E-Infrastructures and Data Management(2) Food Security and Land Use Change
- 2012: (1) Coastal Vulnerability
 - (2) Freshwater Security

Preparatory Workshops & Travel

DFG Initiation of International Collaboration

- Trips abroad (max. three months) or guest visits in Germany (max. three month);
- Exploratory workshops (up to 15 participants abroad: up to 30 in Germany);
 DFG supports with standardized allowances
- The modules may be combined
- All activities must be carried out within a period of 12 months

Wissenschaftliche Gesellschaft Freiburg

- Preparatory Workshops
- deadlines 2017; May 26, October 27
- Travel Grants for Conference talks
- up to 1.500 €
- deadline: 5 weeks before journey

Albert-Ludwigs-Universität Freiburg

UNI FREIBURG

University of Freiburg - FRIAS

FRIAS Project Groups 2018/19

- 20,000 € for workshops, travel, guests
- deadline: October 31st

FRIAS COFUND Fellowship Programme 2018/19

deadline: October 10th

FRIAS internal Junior+Senior Fellowships 2018/19

- deadline: October 31st
- Senior: 10 months, 50% reduction of teaching load,
- Junior: 10 months, 100% reduction of teaching load, 5,000 € consumables/month

Albert-Ludwigs-Universität Freiburg

University of Freiburg - FRIAS

FRIAS Junior Researcher Conferences 2018/19

- up to 5 workshops, 8,000 € each
- deadline: October 31st

FRIAS Alumni-Programme

- for researchers who had a research stay at FRIAS to "come back"
- 2 to 6 weeks without interruption
- work space at the institute and, after the research stay at FRIAS, will reimburse economy travel costs and accommodation costs
- No deadline

Albert-Ludwigs-Universität Freiburg

EUCOR Seed Money

- 60,000 EUR
- up to 18 months
- minimum 3 cooperation universities
- deadline October, 2nd

University of Freiburg: Reseach Innovation Fund

- Start-up-fundig for new research projects
- priority given to young researchers
- Deadlines: March 15, September 15

III. Societal Challenges

- Health, demographic change and wellbeing
- European Bioeconomy Challenges
- Secure, clean and efficient energy
- Smart, green and integrated transport
- Climate action, resource efficiency and raw materials
- Europe in a changing world
 - Secure societies

Top down funding

Mainly bottom up funding

Horizon 2020 – What is in it for you?

Albert-Ludwigs-Universität Freiburg

<u>1. Money</u> 100% of direct costs plus 25% overhead

<u>2. Science</u> Scientific exchange and collaboration with international partners

Horizon 2020 – How to participate?

Albert-Ludwigs-Universität Freiburg

UNI FREIBURG

Any institution may participate either as a Partner or as a Coordinator!

- Responsibilities of the Coordinator:
 - Submits the proposal and (generally) leads the project.
 - Reporting responsibilities
 - Receives payment from the Commission and distributes to partners
 - Acts as a 'hub' for queries between Partners and Commission
- Resources and Benefits?
 - Coordinator receives adequate funding for resources to manage the consortium. Costs are claimed as incurred and cannot lead to a profit.
 - Closer links to Brussels
 - Prestige (?)

Horizon 2020 – Who can participate?

Albert-Ludwigs-Universität Freiburg

Open to almost any entity....

 ✓ EU Member States (28)
 ✓ Candidate Countries

 e.g. Turkey, Serbia

 ✓ Associated Countries

 e.g. Switzerland, Norway, Israel

 ✓ International Cooperation Partner Countries (ICPC)

 e.g.: 3rdworld countries

- ✓ Industry
 - Multinationals to SMEs
- ✓ Research organisations
- ✓ Universities & other HEIs
- ✓ Public bodies
 - e.g.NHSTrusts
- ✓ Trade Associations
- ✓ International Bodies
 - e.g. Red Cross, etc

Horizon 2020 – Participation Rules

Albert-Ludwigs-Universität Freiburg

- Most of the EU funded projects are collaborative projects with at least 3 organisations from different EU Member States or Associated countries.
- Calls are top-down, describing a specific challenge, the scope of the call, and the expected impact.

Sustainability Research

Pathway to a conceptual research marketing

North America & Europe 2018-2020

Who?

Upper Rhine Cluster for Sustainability Research (URCforSR) engages the Universities of:

Eucor – The European Campus' in Basel, Freiburg, Karlsruhe, Mulhouse and Strasbourg, the University of Koblenz and Landau as well as various universities of applied sciences and research institutes as associated partners.

= the convened competence is a great value for any cooperation with North America on this very field.

What?

Long-term objective: establishment of a research association with at least European significance and an influence on North America.

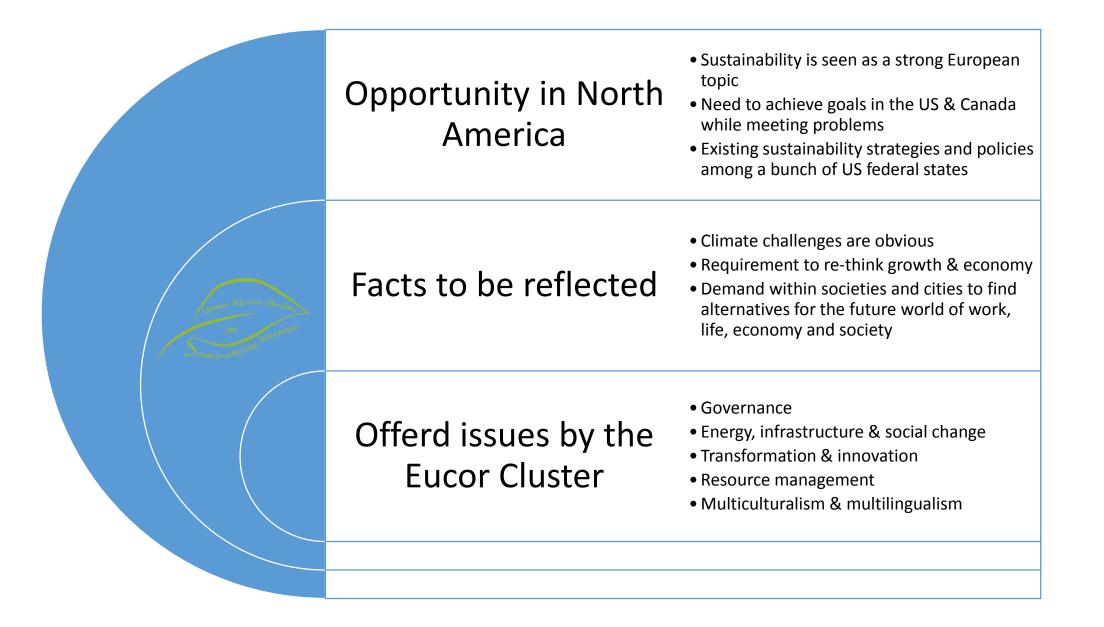

Development of joint excellent, cross-border and interdisciplinary research activities and the realization of a beacon of knowledge for the society(ies).

The research activities are geared to the comprehensive subject matter "Governance of Sustainable Growth", which is subdivided in five fields of investigation, all of which are meant to contribute to the overall topic and might lead to solutions. (some quotes taken from the website)

? How to differentiate Eucor in a competitive landscape of Higher Education and Research in North America

? Why might we have a chance to get an awarness

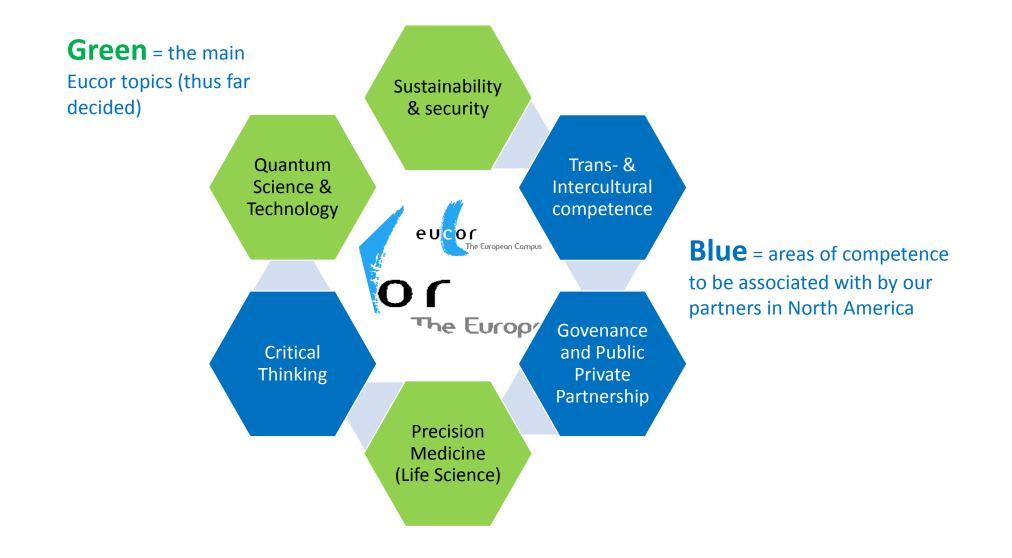

U We understand the trends and demands e.g. in the USA and Canada (target region of the Liaison Office).

□ We synchronize external expectations (USA/Canada) with internal (Eucor) visions and competences.

We establish Science & Humanities in an Europaen (critical thinking) tradition with natural born links to the future.

We demonstrate the scientific impact on social and economic developments and the contribution of Eucor research outcomes with strong solutions.

Structure of Eucor's work on Marketing North America

Stage: "Discussion"

and results.

Stage: "Messages"

- We offer 1,2,3..!
 - We create good messages!
 - We practice a convincing research marketing!

Stage: "Reflection"

We prioritise projects, formats, communication.

- What are our goals?
- How to focus?
- What is the pathway to promote "sustainability" as one of Eucor's core areas?

promotion in North America.

Stage: "Awareness"

- We evaluate impact.
- Do we get real ٠ awareness?
- Do our offers, research ٠ results and transfer ideas convince partners?

Goals for USA and Canada	Universität Basel	FREIBURG	Kartsruhe Institute of Technology	UNIVERSITÉ DE STRASBOURG	Further partners
Sub goals	Main Topic	Sustainability Research			
Governance					
Energy, infrastructure & social change					
Transformation & innovation					
Resource management					
Multiculturalism & multilingualism					

? Which marketing and communication formats might work

Formats	What	When	Where
General Public Event	Up to 150 participants come together; a research topic will be discussed by Eucor scientists and counterparts from Canada and/or the USA; a moderator leads the evening followed by a networking reception	Time for prepartion 8 months: either March-May or October- November are good slots in North America	German Mission to the UN, location of the Liaison Office, New York
Talking Eucor Labs	Focused academic format, scientists (PIs and junior scientists) work together within partner labs; collaboration in a specific time frame – e.g. 3-5 days followed by a stakeholder talk (public partners, government and/or media)	Could work best after getting results to a specifit sub topic which might be reflected with scientific partners – this format is an option anytime; run up to a "Lab week" could take 6 months	Hosts are Eucor Partners e.g. Fraunhofer Society USA, Northwestern University Boston or swissnex, Boston
Funnel and Transform	Workshop(s) with scientists and the heads of the Knowledge and TT-Technology Transfer Offices to draft a process how to identify promising research outcomes and their capability for impact on societies and the finding of solutions	 Each meeting might need a day: Introduction One on one meetings Summary and transfer pathways Networking 	Following a mapping of sub topics and potential partners we might identify regions and cities in North America step by step

Summary of the milestones:

- Fact finding: which goals, themes, which choise of "products"?
- Reflection and priority setting: which top messages should be deliverd by Eucor to North America on sustainability research?
- Definition of tasks: who is in charge for which topic among the Eucor Alliance?
- Timeline for activities: schedule 2018-2020
